```
In [12]: # Program to calculate sum of two integers
a = input("Enter first integer: ")
b = input("Enter second integer: ")
try:
    c = int(a.strip()) + int(b.strip())
except:
    print("Invalid inputs entered")
else:
    print("Sum of two integers: " + str(c))
```

```
Enter first integer: 5
Enter second integer: 7
Sum of two integers: 12
```
